DETAILED ACTION

Allowable Subject Matter

1. Claims 1-34 are allowed over the prior art.
2. The following is an examiner's statement of reasons for allowance: regarding claim 1, the primary reason for the allowance of the claims is due to the fact of the specific structure of a circuit for measuring leakage current wherein the circuit has a pre-charge device coupled to a leakage test device, a differential amplifier coupled to both devices and a delay unit that is coupled to differential amplifier and the input of the pre-charge device. Since claims 2-12 depend from claim 1, they also have allowable subject matter.

Regarding claim 13, the primary reason for the allowance of the claims is due to the fact of the specific structure of a circuit for measuring leakage current wherein the circuit has a pre-charge device coupled to a first node, a leakage test device coupled to second node, and a differential amplifier coupled to both first node and second node wherein the pre-charge device is being turned on and off at a frequency that is proportional to the leakage current. Since claims 14-26 depend from claim 13, they also have allowable subject matter.

Regarding claim 27, the primary reason for the allowance of the claims is due to a method for measuring leakage current comprises driving a circuit comprising a pre-charge device, a leakage test device and differential amplifier then extracting a first test signal from said circuit and finally estimating the leakage current. Since claims 28-34 depend from claim 27, they also have allowable subject matter.
